(54) Title: RETRACTABLE STRAW DEVICE

(57) Abstract: A device (10) for a drinks container (11), the device comprising a straw (16) and means for actuating the straw (16) between a retracted state, in which the straw (16) is housed, in use, substantially within the container (11), and an extended state, in which at least a portion of the straw (16) protrudes, in use, from the container (11). The actuating means may comprise a first casing (12) provided around a portion of the straw (16), the straw (16) and the casing (12) being rotatable with respect to one another about a longitudinal axis, the actuating means further comprising means for imparting generally linear movement to the straw (16) upon relative rotational movement of the casing and the straw portion.
